ABOUT ME

As a full-stack developer with 8+ years of experience, I am adept at developing dynamic and responsive web applications using **HTML5**, **CSS3**, and **JavaScript** frameworks like **React.js**, **Vue.js**, **Node.js**, and **AngularJS**. My expertise extends to backend technologies, including **PHP**, **Symfony** and **MySQL**. Moreover, being proficient in CMS platforms such as **WordPress** and **Shopify**, I deliver high-quality and innovative solutions for each project. I am also adept at good SDLC processes, some of which I helped establish from scratch.

MY SKILLS

JAVASCRIPT

React.js • React Native • Node.js •
Next.js • Vue.js • Angular.js • GraphQL

PHP

Symfony • Laravel • MySQL/SQL •
RESTful Web Services

DEVOPS

GitHub • AWS • Google Cloud

FRONT-END

HTML5 • CSS3 • SASS/LESS •
Material • Bootstrap • Foundation

CMS

WordPress • Shopify • Drupal •
HeadlessCMS

DESIGN

Figma • Photoshop • Adobe Illustrator

WORK EXPERIENCE

FULL STACK DEVELOPER

PANASONIC

2022 - Present

As a Full Stack Web Engineer at Panasonic, I developed an inventory management portal using **Next.js**, **React**, **Node.js**, and **PHP**. I optimized **MySQL** and **MongoDB** for efficient data access and integrated RESTful APIs for seamless backend communication. I collaborated closely with a cross-functional team, following Agile practices for sprint planning, code reviews, and feature development. Additionally, I contributed to CI/CD pipeline automation, ensuring smooth deployments and system scalability.

- Developed dynamic web applications utilizing React.js, Symfony and Node.js while also being the de facto team leader of our engineering team.
- Designed responsive UIs with Bootstrap and Material, enhancing user experience and accessibility.
- Architected and developed a Symfony monolith solution with relational database to handle our internal operations but also be scalable and robust.
- Helped develop automated workflows, CI/CD pipelines that ensure efficient delivery and also reliable automated regression and unit testing.
- Helped mentor developers as well as making them adept with standard SDLC practices, reviewing their PR's and providing feedback ensuring no blockers for the team.
- Led the charge in setting standard SDLC practices in our devops cycles and project management.

WORK EXPERIENCE

SENIOR WEB DEVELOPER

VENTION

2017 - 2022

As a Web Developer at Vention for 5 years, I was responsible for designing and developing dynamic websites, ensuring smooth user experiences, and implementing robust backend functionality. I worked closely with cross-functional teams to build custom web solutions, optimize site performance, and manage maintenance and updates. My role was to involve coding in various programming languages, debugging, and improving web security and scalability to meet client and business requirements.

- Developed advanced B2C web applications using Next.js/React.js Vue.js on the frontend and Node.js/Laravel/Symfony on the backend, with beautiful UI/UX and robust backend architecture at the forefront.
- Architected highly scalable and performant database solutions using SQL and No SQL.
- Managed high-traffic websites with WordPress and Shopify, ensuring scalability and security.
- Utilized Figma and Photoshop for designing visually appealing web layouts.
- Integrated RESTful web services to streamline data flow in web applications.

WEB DEVELOPER

SMARTSITES

2015 - 2017

I began my career as a Front-End Developer at SmartSites, where I worked on a variety of web development projects using HTML, CSS, JavaScript, WordPress, and PHP. I contributed to both team-based and individual projects, building responsive, user-friendly interfaces, and customizing WordPress themes to meet client needs. I was responsible for implementing front-end features, ensuring cross-browser compatibility, and optimizing performance for a seamless user experience.

- Specialized in WordPress theme development using HTML5, CSS3, and Bootstrap for responsiveness.
- Customized WordPress plugins, enhancing functionality and the user experience on websites.
- Employed PHP, Laravel, and MySQL to create robust back-end solutions for WordPress sites.
- Developed and managed Shopify stores, enhancing e-commerce functionality and user experience.
- Integrated RESTful web services with WordPress for seamless data handling.
- Managed version control and deployment using GitHub, ensuring smooth WordPress updates.

EDUCATION

BSCS (BACHELORS IN COMPUTER SCIENCE)

NUECS

2010 - 2014
